

# A BEGINNERS GUIDE TO ACTING

# TRUTHFUL ACTING

All acting starts with a simple premise. 'Being Real Under Imaginary Circumstances'. That's what makes acting good. It feels real. For actors, we **MUST** make the world of our character **REAL**. Doing that isn't easy. It takes practice, technique, and training. If we can make the world real to us as the actor, our world becomes real to our audience.

# **4 CORNERSTONES OF ACTING**

**In order to begin to understand the world of acting you need to break it down. There are 4 Cornerstones to master to become an actor.**

- 1. Voice & Body**
- 2. Emotional Life**
- 3. Imagination**
- 4. Script Analysis**

# **TECHNIQUE**

**Strasberg, Hagen, Stanislavski and many other of the worlds best acting teachers developed incredible techniques for making your characters emotions and world real. It's the difference between 'Acting' and real emotion. Sense Memory, Magic If, Repetition, and Substitution are just a few of the techniques you'll learn with AWM Studio**

# INDUSTRY

**The Acting Industry is one of the hardest to break into, and even harder when you don't know how things work. Finding auditions is just the first part. In order to book parts, gain experience, and get an agent you need to be able to impress people with your acting so you can book jobs. The best way to get better is to practice and train with a professional acting studio in your area.**
